Logical Enhancements

- Functions for WMS and other ILSs and Web Services
- Working with Uborrow
- Delivering NCIP Server Addon through Logic
- Delivering GIST through Logic

- Continuing to develop Rules and Services based on Community need

IDS Data Services

- Using IDS Logic as the connector, provides:
  - In-depth analysis of how IDS is functioning as a resource sharing consortium.
  - Offers TDT the opportunity to find workflow problems to address that will provide the most benefit.
  - ILL data reports from ILL experts.
  - Opportunity to create complex customized reports.
