# Online Learning Institute

Courses:
Borrowing 101 | Lending 101 | Copyright 101

Seats limited to 30 students. Fall Registration Dates forthcoming

## Online Workshops

Opening again this Fall!

## Mentor Program: Benefits if you have a Mentor

- Access to Atlas Training Suite (\$999.00 annual subscription)
- •Conference fee to *International ILLiad Conference* covered (\$200)
- Conference & hotel to Annual IDS Conference covered (\$175+ hotel)
- Professional development opportunities available
- Collaborate with other mentors
- Travel & accommodations for site visits covered
- Opportunities to learn from others & bring new ideas back to your library

### Mentor Program: Benefits to your staff & library

- General on-call assistance
- Available via email
- Go-to-Assist online support
- Polishing-up after Atlas training
- Workflow evaluation & optimization
- Workflow Toolkit updates & additions
- Access to Mentors at Regional User Groups
- Site visits

What's New with Logic?

### **Current IDS Logic Beta Testers**

- 1. Yale University
- 2. University of Oregon
- 3. Northwestern University

Syracuse and Upstate Medical

## **IDS Logic Modules**

**Borrowing Availability Service** 

**Book Chapter Direct Requester** 

Lending Book Chapter Availability Lookup

**Custom Transaction Router Emailer** 

Lending Availability Service

Direct Request Enhancer

ALIAS 2.0

#### **Borrowing Availability Service**

- Looks at Borrowing Requests with an ISBN or OCLC# in Awaiting Request Processing
- Checks your library's catalog to determine if you own the material. If you own the material:
  - Determines if the item is checked out.
  - Applies multiple rules to check if item is in specific collections, such as coure reserves, that would prompt a borrowing staff to cancel or review the request.
  - Multiple availability settings are possible, just as with Lending Availability Service, and the configuration will be facilitated with the IDS staff who sets up your site.
  - If item is deemed "not available" at your library, request is sent to "Awaiting Direct Request Sending" to be sent out as an OCLC request via direct request.
  - o If item is "available" at your library, call # and location are filled in, and the transaction is routed to the designated queue in borrowing or document delivery. Default is "Awaiting DD Stacks Searching" in Document Delivery.

### Book Chapter Direct Requester

- Determines if the request is a book chapter request (differentiates between issn and isbn)
- Searches your z39.50 for availability information, and then either
- Cancels in OCLC and Illiad, using appropriate cancellation reason in both systems, if book chapter is requested from something that is checked out or in a collection from which you do not scan.
- If available to scan, Imports call number and location information into transaction in ILLiad.
- Routes to specified queue, which could be Awaiting Stacks Searching or another custom queue.

### Lending Book Chapter Availability Lookup

- Determines if the request is a book chapter request (differentiates between issn and isbn)
- Searches your z39.50 for availability information, and then either:
  - Routes to Doc Del (importing call number and location) if you own the item and it is available.
  - If not owned or unavailable, sends request out via OCLC/Worldshare ILL with appropriate lender string.

#### Custom Transaction Router Emailer

- Runs the query specified on the queue, status, and transaction type.
- Unlike client addons, does not need an action to run. For example, this
  can route transactions from queues or send emails even if they have not
  changed status for days or weeks.
- No limit on length of query on routing rule.
- Can only send emails to default addresses (patron email for borrowing, and borrowing dept email from requesting library for lending)
- Can be run on multiple queues simultaneously.

### Lending Availability Service

- Extracts ISBN and OCLC# from request and queries the library's z39.50 server to return availability information.
- After information is returned from Z39.50 server, availability rules are applied to determine whether this loan is available for lending via ILL.
- After availability rules are applied, and availability from your catalog/z39.50 is returned:
  - a. Unavailable requests are canceled in OCLC and Illiad, using appropriate cancellation reason in both systems.
  - b. If available to lend, Imports call number and location information into transaction in ILLiad. Due date, renewal information, and other relevant information is also inserted..

### Direct Request Enhancer

Looks at Transactions that fail Direct Request due to not enough lenders and:

- Takes the OCLC # or ISBN and transforms into mostly held OCLC number of a different edition
- Routes the Transaction to "Awaiting Direct Request Sending"
- Transaction is sent out to potential lenders via the LendingString created based on Custom Holdings and Direct Request profile
- If it fails, it will try the next most commonly held
   OCLC # matching the item requested

33 IDS libraries have upgraded to ALIAS 2.0.

## Have you?

Please contact Bill Jones at <u>jonesw@geneseo.edu</u> to schedule a meeting and have this completed by the end of August.

### **IDS Data Services**

Looking to automate end of year reports.

We're also looking for ideas from you to see what types of reports you would like automatically generated.

## ILLiad 8.6 Preparation Guide for Email Templates

### Benefits of sending e-mails through ILLiad

- E-mails are already typed and ILLiad will merge information such as patron name and request info
- You know who sent the e-mail
- You know what day and time the e-mail was sent
- E-mails are in the transaction history for all staff to see and read
- E-mails paired with Routing Rules save time(Example: Borrowing-Renewal E-mail routes the book request back to Checked Out to Customer

## What is changing in 8.6

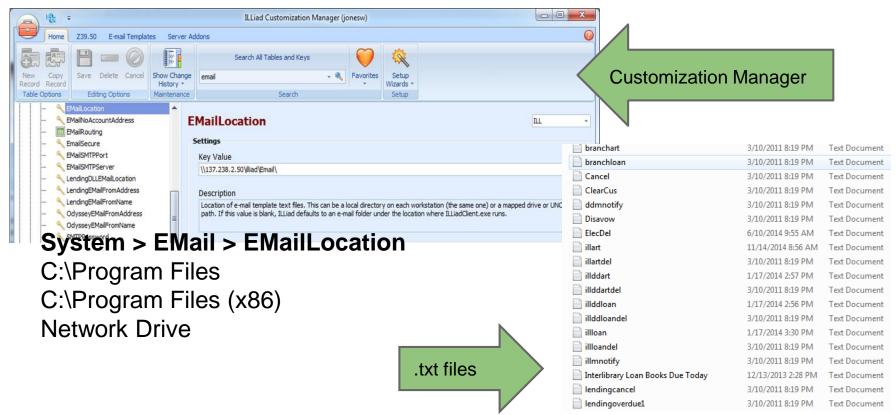

- The Email Template tab in the Customization Manager has been renamed to Notification Templates.
- Email subjects will now be set in the email template, and EmailSubject customization keys have been deleted.
- Field tags in email templates now use the table.fieldformat. Templates that already exist will be updated (for example, changed from <#LoanTitle> to <#Transaction.LoanTitle>).

https://prometheus.atlas-sys.com/display/illiad/ILLiad+8.6+Release+Notes

AFTER UPGRADING: If you delete the .txt from the name remember to change the name in your e-mail routing rules!!! When creating new e-mails in the Customization Manager you no longer need .txt in the file name.

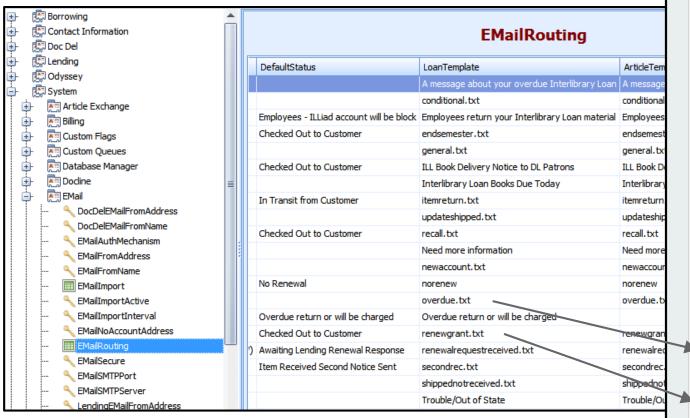

### Where are your Print and E-mail Templates?

#### **Borrowing**

- Auto Cleared User The email used when a user registers and is automatically cleared.
- **Borrowing Password Reset -** The email used when a borrowing user requests a password reset.
- Borrowing Cancel The email used to notify patron their request has been cancelled materia
- Cleared User The email used when sending out the notification email when a user is cleared.
- Disavowed User The email used when sending out the notification email when disavowing a user.
- Merged User The email used when sending out the notification email when two user records are merged.

#### WE'RE MOVING!

#### **Lending**

- Lending Cancel The email used to notify lenders their request has been cancelled
- Lending Password Reset The email used when a lending user requests a password reset.

## **ILLiad 8.6 Default Borrowing Emails**

**Auto Cleared User -** The email used when a user registers and is automatically cleared.

Borrowing Cancellation Article - The email used when sending out the borrowing article cancellation email.

Borrowing Cancellation Loan - The email used when sending out the borrowing loan cancellation email.

Borrowing Electronic Delivery - The email used when sending out the borrowing electronic delivery notification email.

**Borrowing Overdue 1 -** The email text used when sending out borrowing overdues for the first overdue period.

**Borrowing Overdue 2 -** The email text used when sending out borrowing overdues for the second overdue period.

**Borrowing Overdue 3 -** The email text used when sending out borrowing overdues for the third overdue period.

**Borrowing Overdue Reminder -** The email text used when sending out borrowing overdue reminders.

**Borrowing Password Reset -** The email used when a borrowing user requests a password reset.

Cleared User - The email used when sending out the notification email when a user is cleared.

**Disavowed User -** The email used when sending out the notification email when disavowing a user.

**ILL Borrowing Article Delivery -** The notification email text used for articles delivered to customers.

**ILL Borrowing Article Pickup -** The notification email text used for articles available for customer pickup.

**ILL Borrowing Loan Delivery -** The notification email text used for loans delivered to customers.

**ILL Borrowing Loan Pickup -** The notification email text used for loans available for customer pickup.

**Merged User -** The email used when sending out the notification email when two user records are merged.

## ILLiad 8.6 Default Lending E-mails

**Article Exchange Lending Notification -** The email text used to notify a borrowing library that an Article Exchange document has been uploaded.

Lending Cancellation Article - The email used when sending out the lending article cancellation email.

**Lending Cancellation Loan -** The email used when sending out the lending loan cancellation email.

**Lending Overdue 1 -** The email text used when sending out lending overdues for the first overdue period.

**Lending Overdue 2 -** The email text used when sending out lending overdues for the second overdue period.

**Lending Overdue 3 -** The email text used when sending out lending overdues for the third overdue period.

**Lending Overdue Reminder -** The email text used when sending out lending overdue reminders.

**Lending Password Reset -** The email used when a lending user requests a password reset.

### ILLiad 8.6 Default Doc Del E-mails

**Doc Del Cancellation Article -** The email used when sending out the document delivery article cancellation email.

**Doc Del Cancellation Loan -** The email used when sending out the document delivery loan cancellation email.

**Doc Del Electronic Delivery -** The email used when sending out the document delivery electronic delivery notification email.

ILL Doc Del Article Delivery - The notification email text used for Doc Del articles delivered to customers.

ILL Doc Del Article Pickup - The notification email text used for Doc Del articles available for customer pickup.

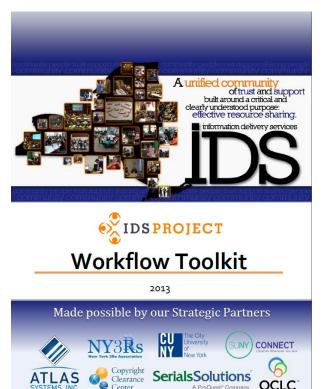

**ILL Doc Del Loan Delivery -** The notification email text used for Doc Del loans delivered to customers.

**ILL Doc Del Loan Pickup -** The notification email text used for Doc Del loans available for customer pickup.

Note: SMS/Text messages will not work for lending

https://prometheus.atlassys.com/display/illiad/Text+Message+Templates

# Sandbox: Email Template Creation

#### **Email Templates discussion**

- How many people have access to the Customization manager and have seen the email templates?
- What useful email templates do you have?
- What email templates do you use the most?
- What do you find yourself constantly editing off of a general email template?
- What email do you manually send over and over?

#### **Lunch Break**

Thank you to Atlas Systems!

# **Email Routing Rules**

- [Partially automate]
   organization and
   tracking using
   emails/queues
- Process is same for both 8.5 and 8.6

#### Do I Need a Rule?

 Do you find yourself sending the same email over and over?

- Do you want to keep track of those requests?
- Do you want to group requests in a queue related to an email?

### Do I Need a Rule...(cont'd)?

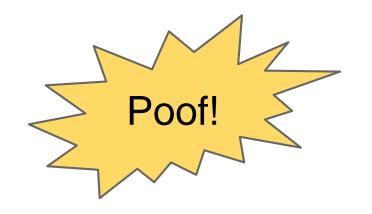

Then yes, email routing is for you

- To make a rule work you need three things:
  - Email template to use
    - (Covered before lunch)
  - Queue to move requests to/from
  - Email routing rule

# **How does Email Routing Work?**

Instead of sending an email and \*then\* manually routing the request, the queue changes as the email is sent.

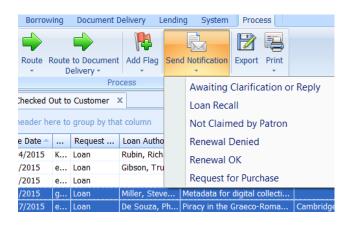

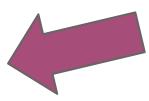

With Email Routing, one step takes care of two tasks!

# How does Email Routing Work? (pt. 2)

Like with using any email templates you can send as a batch from the queue screen:

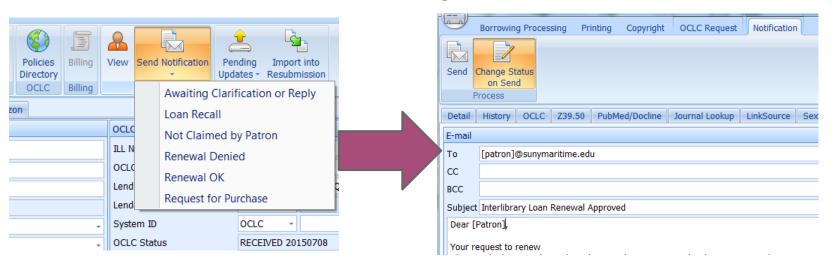

Good when you have a lot to send out and don't need to edit the emails before sending.

# How does Email Routing Work? (pt.3)

Or send from the request (where you can edit the email before sending)

### **Creating Queues**

- Sometimes you'll want to group requests in a queue that doesn't exist
- To create a queue:
  - Customization Manager -> System -> Custom
     Queues -> Custom Queues
     Eystem

🔁 Article Exchange

편 Custom Flags

🛅 Custom Queues

🛅 Billing

# **Creating Queues**

- Like with other things in CM- two choices:
  - New Record or Copy Record
- Set Process Type and give Queue a name
  - Make sure to save!

			Custo	mQueues
QueueName		ProcessType	NVTGC	
Awaiting Clarification or Reply		Borrowing	ILL

Awaiting Renewal Request Processing		Lending	Lending	
Awaiting RIISH Request Processing		Lending	Lending	
		Edit	Row	,,,,
QueueName	Important Custom Qu	ieue		
ProcessType	Borrowing			
NVTGC ILL				

#### Remember!

- You will need to enter it exactly as written here in the routing rule
- Unless you're on 8.6 already, your patrons can see the name of the queue in tracking
  - In 8.6 you can assign aliases to queues patrons can see

#### Check that email exists or create one

Go to the Email Templates tab in the Customization Manager

Search for the Email template you want or click on New to create one.

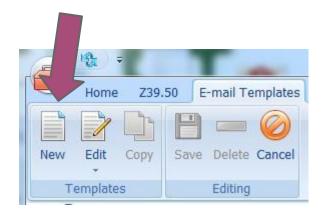

Once you find the Email Template, copy the name

4444	specialcollections_lend	III 7700	71.1
Name:	specialcollections_lend	NVTGC:	ILL
	i i		
	Email asking if we can lend an item in special collections		

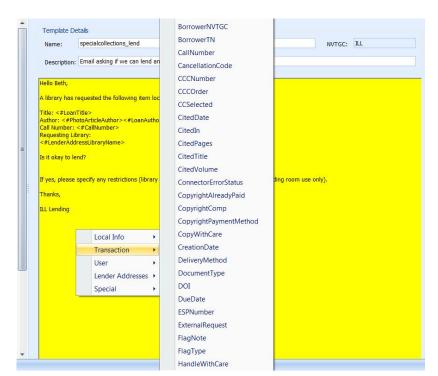

#### **Create an Email**

Go to the E-mail Template tab and click on New

 Right click in email to find a field name

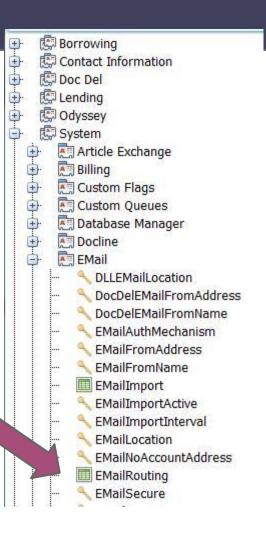

## Creating a rule

#### Go to Email Routing

- In the left menu go to: System Email
- EmailRouting

Choose New Record to create one.

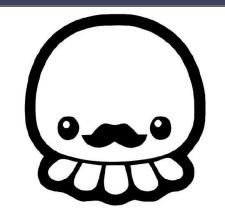

# Creating a rule pt 2

- Fill out the fields
- Leave these blank if emailing the patron

**Edit Row** 

<b>\</b>

# **Email Routing Discussion**

- What are some email routing that you use?
- Are there things that you would like to be able to set up rules for?
- Do you have any questions about what is possible through routing rules?

# **Borrowing Loan Renewals**

To let patrons know their renewal requests were approved or denied

Rule returns item to Checked Out to Customer once notification is sent

#### **Email**

Template Details					
Name:	renewalok	NVTGC:	ILL		
Description:	Renewal Request Approved				
E-mail SMS					
From Name:		From Address:			
To Name:		To Address:			
CC Address:		BCC Address:			
Subject:					
Dear <#User.FirstName> <#User.LastName>,					
Your request to renew <#Transaction.LoanTitle> Transaction number <#Transaction.TransactionNumber> has been approved.					
Your item is now due on <#Transaction.DueDate>.					
If you have any questions, please contact us at <#LocalInfo.GeneralEMailAddress> or <#LocalInfo.GeneralPhone>.					
SUNY Maritime College Interlibrary Loan					

#### Rule

ProcessType	Borrowing
Name	Renewal OK
DefaultToAddress	
DefaultToName	
DefaultCCAddress	
DefaultSubject	Interlibrary Loan Renewal Approved
DefaultFromAddress	library@sunymaritime.edu
DefaultFromName	SUNY Maritime ILL Department
DefaultStatus	Checked Out to Customer
LoanTemplate	renewalok
ArticleTemplate	renewalok
NVTGC	ILL

### **Borrowing Loan Renewal OK**

#### This function:

- Identifies the system note that is created when the lending library provides a different due date than your system settings
- Reformats the date in the system note, and updates the due date field in the ILLiad transaction based on the due date provided by the lender.
- Sends email to the patron notifying them of new due date
- Routes transaction to "Checked out to Customer" status.

#### You can configure for:

- Which email template to use (in the CM) and email subject
- Where to route after the message is sent: (Checked Out to Customer)

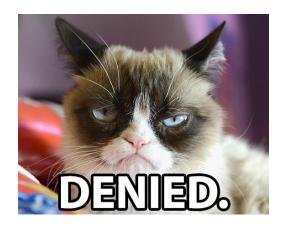

### **Borrowing Loan Renewal Denied**

#### This function:

- Identifies system note that is created when the lending library provides new due date after renewal request is denied
- Reformats the date in the system note, and updates the due date field in the ILLiad transaction based on the due date provided by the lender.
- Sends email to the patron notifying them that their renewal request has been denied
- Routes transaction to "Checked out to Customer" status.

#### You can configure for:

- Which email template to use (in the CM) and email subject
- Where to route after the message is sent: (Checked Out to Customer)

# **IDS Logic: Pickup Reminder**

You can configure for:

- Transaction Status (Customer Notified via E-Mail)
- •How long the TN has been in the queue (7 days)
- Which email template (in CM)
- What email subject
- What to add in the TN notes

I've been sitting here for seven days...

## **Logic Ideas**

What emails and processes do you think would be useful to automate sending through a Logic Rule/Custom Emailer?

# **Print Templates**

#### 8.6 Upgrade Impact

#### «IT WILL AFFECT YOUR PRINT TEMPLATES»

#### **HOW ARE THEY AFFECTED?**

Addresses printed on Lending and Borrowing templates are now pulled from:
The **ShippingAddresses** table (which contains OCLC constant data) **NOT** 

The **LenderAddresses** table.

https://prometheus.atlas-sys.com/display/illiad/Print+Template+Addresses

# In other words...

Addresses will no longer be pulled from your Maintenance Address Forms, but from the Constant Data form filled out by the Lending Library

# On the templates....

LenderAddresses\_LibraryName, LenderAddresses\_Address1, etc. are now coming from

# **Constant Data**

and field names for addresses in your Maintenance Address Form have been renamed:

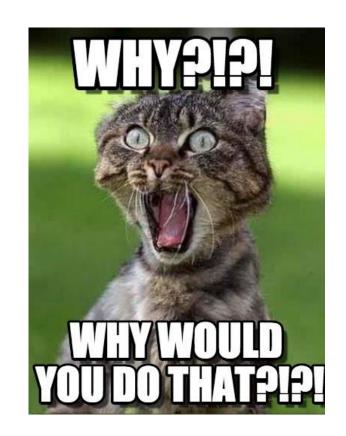

Example: LA\_LibraryName, LA\_Address1, etc

# What?! Why?!

- One symbol/multiple addresses
- Current addresses in CD vs. outdated Maintenance Address Forms

And...to mess up your customized labels (ELD)

# Multiple Addresses Example

- Consortia out of New Jersey - NJQ
- 120 + libraries associated with symbol

Lubbock, Texas 79409-0002 United States

# Where's Waldo? I mean, the Print Templates!

### They hide:

- on your local machine (c:\Program Files (x86)\ILLiad\Print|
- 2) network drive
- on everyone else's machine but yours

Remember: your .xls files live in the currently logged in user's local Documents folder under ILLiad\Print\

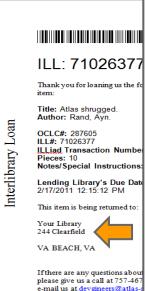

# Identify which templates you use

### **Templates Affected:**

- BorrowingLoanLabels.doc
- BorrowingReturnAddressLabels.doc
- LendingLoanSlips.doc
- Lending Rapid Stacks Searching
- LendingLoanShippingLabels. doc
- LendingArticleShippingLabels .doc
- Lending Secondary Label Printing
- Lending Overdues
  - a. Ex. LendingOverdueLetter1.doc
- PrintRequest.doc

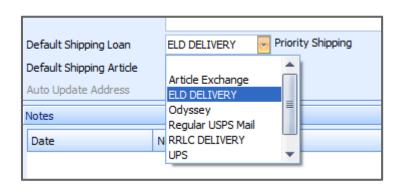

Fax: «FAX»
Ariel: «ArielAddress»

Basically, any template you have an imported address on

### **Beginning your "Smart" Template Customization**

1. Use the dropdown Default Shipping Loan field and an If...Then...Else statement.

AND:

2. use a "hook"

«LenderAddresses\_DefaultShippingMethodLoa»

NOTE:

Glen's silent video:

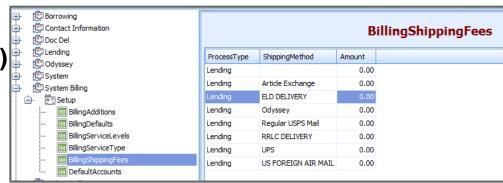

https://www.youtube.com/watch?v=0vGXIBECI1g&feature=youtu.be&hd=1

# How to Add the Delivery Methods

- In Customization Manager select:
   System Billing|Setup|Billing Shipping Fees
- <click> New Record
- Process Type = Lending
- ShippingMethod = (your lingo)
- Amount = **0.00**

Instant delivery types!

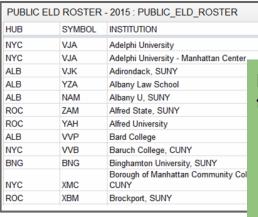

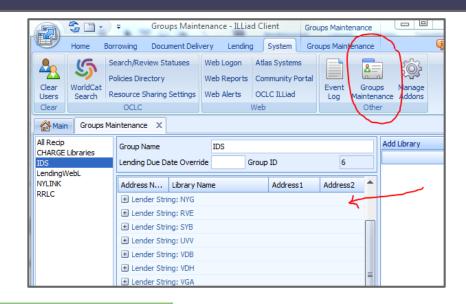

NOTE: make your first option "Shipping Method" a 'blank' by typing a [space] into the Shipping Method space. This will prevent all *NEW* addresses you add from having the default of ELD DELIVERY as their delivery method.

# Find your ELDs...

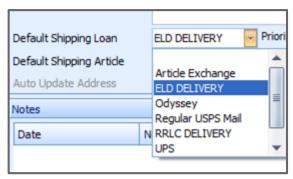

Locate your ELD libraries to select the "ELD delivery" method.

- 1) Custom Search for ELDs
- 2) Group Maintenance Form
- 3) Using the ELD Roster
